

CopyAlertTM

CopyAlertTM

protects your computer files from
being copied by unauthorized
parties...

CopyAlert™

- Edward Snowden steals NSA secrets
- Bradley Manning steals Department of Defense secrets
- General Motors secrets stolen on thumb drive
- Motorola secrets stolen on thumb drive
- Apple, Boeing, Dow Chemical, Dupont, Ford & Goodyear were all victims of file theft via thumb drives...
- It happens every day... Is it happening to you?

Our patent pending security solution protects your valuable proprietary data from unauthorized copying and alerts you in **REAL TIME** to attempts to steal your data.

CopyAlert™ is a military/government grade security application that disables the capability of an unauthorized party to copy your files to external media sources such as **ALL** USB devices, thumbdrives, CDs, DVDs, iPods, external hard drives, email attachments and transfer of your files to another computer via a network connection.

CopyAlert™

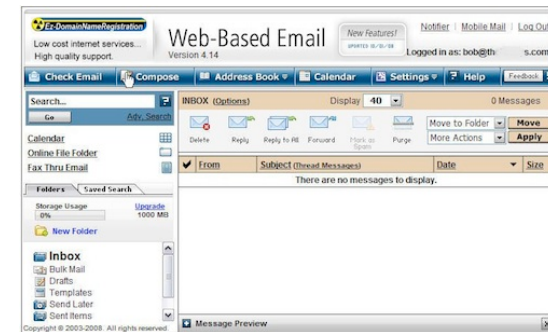

- CopyAlert™ will disable ALL devices plugged into your computer unless white-listed by the authorized user.
- CopyAlert™ also prohibits an intruder from copying your files to your internal CD Drive and will alert the user to ALL attempts in real time.
- CopyAlert™ prohibits unauthorized users from attaching your files to outgoing emails.
- CopyAlert™ will also alert the user with a list of the files that were attempted to be copied by the intruder in real time.
- CopyAlert™ prohibits intruders from copying files ON TO your HD such as trojans, malware, pornography, etc.
- CopyAlert™ will also alert you if someone attempts to copy files TO your computer.

CopyAlert™

- **CopyAlert™** locks USB drives and prohibits copying of computer files to any USB type device by unauthorized users.
- **CopyAlert™** allows authorized users to whitelist their own devices...

CopyAlert™

- **CopyAlert™** also prohibits unauthorized users from copying your files to your internal CD/DVD drive.
- **CopyAlert™** allows authorized users to enter their password and use their internal drives at any time.
- **CopyAlert™** prohibits unauthorized users from sending your files as email attachments or via web based email applications.

CopyAlert™

The screenshot shows the CopyAlert configuration window. At the top is the CopyAlert logo. Below it is a 'Config' section with several input fields: Registered Email, Name, Address, Organization, and Phone. There are also several checkboxes for various settings: Block Copy From USB, Block Copy From CD, Block Copy To USB, Block Copy To CD, Send Email on Copy Attempt, Enable Copy With Authentication, Block Copy To Network, Block Email Attachment, and Block Printing. At the bottom are buttons for About, Set Master Password, Register, Cancel, and Save.

- CopyAlert™ configuration is simple
- CopyAlert™ resides at a very low level on your HD
- CopyAlert™ runs in a complete stealth mode

CopyAlert™

- CopyAlert™ is available in single copy version and custom enterprise site license version for large scale deployment
- CopyAlert™ is available for Windows and Apple computers.
